

Before-turn-after localization continuity

Route B, frame 1214 (turn rate $-12.0^\circ/\text{frame}$)

Route B, frame 1480 (turn rate $12.0^\circ/\text{frame}$)

Route C, frame 713 (turn rate $12.0^\circ/\text{frame}$)

Route C, frame 1040 (turn rate $12.0^\circ/\text{frame}$)

Dots sample the reference trajectory every 10 frames; the arrow indicates motion direction. All traces come from the final Route-B/C model output.
